Create A Cloud Object Storage Service

The screenshot shows the IBM Cloud Object Storage Overview page. The left sidebar contains a navigation menu with options: Cloud Object Storage, Storage instances, Cloud Object Storage-p2, Buckets, Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main content area has a header 'Cloud Object Storage' and a sub-header 'An enterprise cloud object storage solution'. Below this is a welcome message: 'Welcome to your new IBM® Cloud Object Storage service! It provides unstructured data storage for cloud applications. To get started - create a bucket, upload objects and set up access policies to allow other users to work with your data.' There are two buttons: 'Learn More' and 'Take a guided tutorial'. At the bottom, there are three tabs: 'Overview' (selected), 'Create bucket', and 'Access Management'. A taskbar at the bottom shows various application icons and the system clock indicating 02:43 PM on 17-11-2022.

The screenshot shows the IBM Cloud Object Storage Buckets page. The left sidebar is the same as the previous screenshot, but 'Buckets' is now selected. The main content area has a header 'Buckets' and a sub-header 'Buckets serve as containers for objects, and can be individually configured in terms of their location, resiliency, billing rates, security, and object lifecycle rules.' Below this is a search bar and a 'Create bucket' button. A table with the following columns is displayed: Name, Public access, Location, Storage class, and Created. Below the table, there is a section titled 'Buckets' with a sub-header 'Get started by creating a bucket to store unstructured data. A bucket is a container for your data.' The taskbar at the bottom shows the same application icons and system clock indicating 02:44 PM on 17-11-2022.
